

LCAA AirBag LITE

AFTER LAST NIGHTS MEETING I WANTED TO SHARE SOME INFO WITH OUR MEMBERSHIP.....

Park Closed this Friday

one last time this Winter for Deer Hunting. Stay safe and stay away.

Feb 15th —Park and Field Closed

Park is closed to the public (not us) on Monday for Presidents day. If you go to the field. Leave the front gate as you find it.

Hobby Hanger & Club Special

Kwang from Hobby Hanger paid us a visit last night! - You should have been here.....

*Not only did he show off some cool new Spektrum batteries and chargers, called Smart Chargers and Smart Batteries, he informed us of the **great purchasing power of the club** if we place bulk orders for multiples of the same model Horizon Hobby planes. Even as few as 3, the members ordering the planes will see discounts and the more we order the larger the possible discount. Initial discount on club orders placed in the next 60 days are 10% and it goes up from there..*

The focus is on the new Horizon Hobby releases viewed here but if there is enough interest in something else we can probably work a deal:

As an FYI Arlen showed off the new Timber last night pretty cool.....

This also applies to the new Spektrum Smart changers & batteries.

Let me know what you are interested in and if we get enough people wanting the same planes we'll place a club order.

Personally I think the Inductrix Switch Air RTF looks like A LOT OF FUN to fly in my house. Who wants to buy me one.....

Club Fun Fly Plane Updates

Jim S showed off his last night—It's a great little plane. **The Flite Test Simple Scout**

We have **20** laser cut kits containing:

- ⇒ laser cut foam boards
- ⇒ 4 servos
- ⇒ Firewall
- ⇒ control horns
- ⇒ push rods
- ⇒ wheels

Power Pak recommendation:

- 20 amp ESC
- 2212 1000Kv motor
- 3S /1300mah lipo battery

Cost for each Kit — \$35

Since we know it's more fun to build with friends the group build date and location will be announced next month.
